# QUAD Screen Multiviewer(HD1204)

- Control 4 computers with one single device
- Support Quad screen, H screen, PIP screen, two screen and full screen
- Support kvm seamless and without black screen connection between different servers
- Support HDMI audio split output
- Support PCM2, 5.1, 7.1 channel, Dolby 5.1, DTS5.1 output and Mic Output
- Support USB2.0 HUB
- Support Overall/independent switching of LWN, multi screen display, audio, UTC Peripherals , and provide LED indicator respectively
- Support HDMI digital Monitor . fullly complied with HDMI 1.3a and HDCP, resolution is up to 1080P(1920x1200)
- Support IR remote control, easily choose audio port, KVM port, etc.
- Support Broadcast , which can control few servers at the same time

Product

HDMI Screen Multi-viewer is a high-performance screen splitting and switching device, which realizes 4 channels of HDMI signals on the same high-definition display device, and has multiple split screen effects. Multi-screen HDMI KVM switch setup is quick and easy, just plug the cable into the appropriate port.Because the switch directly obtains keyboard and mouse input, no software is required, no complicated installation procedures are involved, and compatibility issues are not considered.
