Overview

Product Description

The KVM console integrates multiple port KVM switches in a 1U height console. It can control multiple computers with a set of devices including monitor, keyboard and mouse, thus saves much cost and space to separately equip keyboard, mouse and monitor for every computer.

It is easy and fast to install the KVM console, you just need to connect corresponding cables to the right ports of KVM and its module without software configuration.

The KVM console can control up to 8 or 16 computers, supports multiple hardware platform and multiple operating system.

Product Features

- 17" & 19" TFT monitor, high brightness, high resolution;
- 1U height, suitable height for standard 19" rack mount, metal structure.
- Ultra slim 99 keys US keyboard with small numeric keyboard.
- High resolution and high flexibility with touchpad with two function buttons and scroll wheel.
- A single console controls up to 8/16 DVI computers
- Select computers via push button, hotkey and OSD
- Two level password security--only authorized users view and control computers; up to four users and an administrator with a separate profile for each
- Users can set up different hot keys(**【Scroll Lock】** / **【Caps Lock】** / **【F12】** / **【Ctrl】**), auto scanning time, port display time, log out time, buzzer on/off and mouse on/off according to their different needs
- Broadcast mode – operations simultaneously performed on all selected computers
Easily choose servers with mouse
- Multiplatform Support-Compatible with Windows, Sun, Unix and Linux
- Complete keyboard and mouse signal simulation to ensure that the booting and switching are correct
- Auto scan feature for monitoring user-selected computers
- Hot pluggable - add or remove computers without having to power down the switch

Hardware Installation

Rack Mounting

A standard rack mounting kit is provided to mount the switch in a depth of 600-850mm (17"), 716-825mm (19") in a standard 19" rack.

For other mounting distance, the rear brackets need to be customized accordingly
With one person hold the switch in place and the other person slides the L bracket into the switch's side mounting brackets from the front to the back, then screws the brackets to the rack. (see below installation drawing)

2-1.1 rack mounting (1)

2-1.2 rack mounting (2)

Installation instruction

- 1) Make sure the rack mounting KVM switch has been connected to the ground (① in the diagram)
- 2) Connect power cable to KVM port as shown in ② in the diagram
- 3) Turn on the power, the KVM start to work after power supply (③ in the diagram)
- 4) Connect KVM switch with the computer according to ④ in the diagram

Note: Connect monitor, USB keyboard and mouse to Console port to connect another console (⑤ in the diagram)

To ensure signal integrity and simplify cable layout, we strongly recommend you using high quality cables with different length.

Opening the console

- Release the release catch;

2-2.1 unlocking

***Note: The release lock can only do horizontal locking, it can't bear any load.**

- Pull the LED panel all the way out until it clicks into place.
- Rotate the LED module all the way back to expose the LED screen, the LED module can be rotated up to 108°.

2-2.2 rotate angle of the console

- Turn on power switch, KVM will be issued two "beep" sound, The Port LEDs light flashes 4 times , the LED displays the prompted to enter the user's password.

2-2.3 password window

- LED panel is powered on when the power LED is green.
- Power on computer or server after power on KVM and you will see green light at each port.
- The factory default password is blank, it will be OK after double click "Enter".

Closing the console

- Close the LED display panel and the power automatically shut down.
- Push the release catch in the direction of the arrow, push the LED panel all the way in until it automatically locks up.

2-2.4 open angle of the console

LED Instructions

3-1.1 front view

| No. | Components | Function |
|-----|------------------------------|--|
| 1 | 1-8 or 1-16 | 1) Switching freely from port 1 to port 8 /16 |
| 2 | Port Selection Buttons& LEDs | Indicator LEDs are built into the switches, the online LED light is on the left and the selected LED light is on the right. 1) An online LED light(green) indicates that the KVM has connected to its corresponding computer and power on. 2) A selected LED light(orange) indicates that the computer attached to its corresponding port is up and running. |
| 3 | Station ID | Display the current port |

Table 3-1.1: LED instructions

LED OSD Configuration

The LED OSD allows you to set up and configure the LED display.

| Buttons | Functions |
|-------------|--|
| MENU SELECT | Press this button invokes the menu function and brings up the main menu. |
| EXIT/AUTO | Press this button exits the current menu and return to the previous menu or press this button exits the LED OSD. Press AUTO for automatic configuration. |
| SL-/SL+ | Press this button moves your menu to make corresponding adjustment. |
| LED state | Green: running Red: power off or access non standard VESA signal Flash green: energy saving mode or no signal |

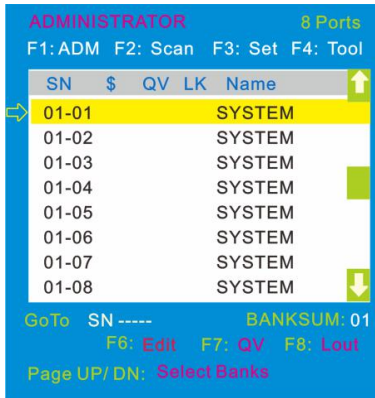

Table 3-1.2: LED OSD configuration instruction

Press AUTO if the screen migrates after power on or under other circumstances, then the screen auto configure to its best display state.(It might can't be adjusted to its best state if part of the display mode is not standard VESA mode, if so return back to OSD menu to RESET, then it will back to normal.

We suggest our customers to set up the display mode at 1280x1024, refresh rate at 60Hz.

| SN | port number |
|  | It shows the computer port is under monitoring. |
| \$ | The computers are power on and are online |
| QV | "#": quick view the port "BC": Broadcast port |
| LK | "@" shows that the port is only available for viewing |
| Name | Port name, the maximum is 12 bytes |

Table 4-1.1 : OSD interface

To access the OSD menu through keyboard:

1. In the submenus that appear, moving the highlight bar to your selected port and then press Enter.
2. Press any key from **【0-9】** to enter any port of current station

To access the OSD menu through keyboard:

**Note: Operate via keyboard after invoke the OSD menu via the touchpad.*

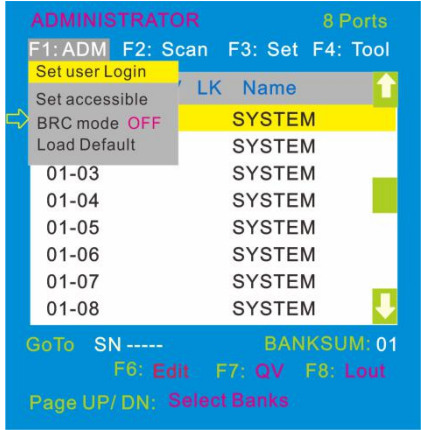

OSD Functions

| Menus | Keys | Submenu/explanation |
|-------|-------------|--|
| ADM | F1 | Set User login: account and password Set accessible: Set access permissions BRC Mode: monitor multiple computers at the same time Load Default: reset the menu to the original factory default settings |
| Scan | F2 | All: Lists all the ports on the installation Power On: lists only powered on ports that have attached computers. Quick View: Lists only the ports that have been selected as Quick View ports |
| Set | F3 | Auto Scan: set scanning time period Port ID: set how long a port displays on the monitor OSD Hotkey: set OSD hotkeys Lout Time off: to set the time out value |
| Tool | F4 | Reset KM: press Enter resets keyboard and touchpad Beeper 【On】 : press Enter switch Bee sounds Mouse Hot 【On】 : press Enter to shut down touchpad operating on OSD. Restore Values: press Enter restore the current user default value. About KVM: press Enter shows the KVM version |
| Edit | F6 | Edits port names |
| QV | F7 | Start or close Quick View |
| Lout | F8 | Log out/blank the console screen |
| Exit | Esc | Press this key exits OSD menu |
| | Scroll Lock | Press this key exits OSD menu |
| | Num Lock | Press this key exits OSD menu |

Table 4-1.2

F1-ADM

● Menu overview

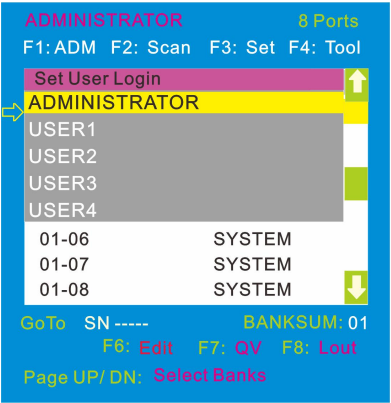

Operating instructions

- 1) Press **【F1】** or **【←】** **【→】** enters the F1 submenus.
- 2) Press **【↑】** **【↓】** moves the highlight bar to select the submenu.
- 3) Press **【Enter】** selects and exits ADM menu.
- 4) Press **【Esc】** cancels the operation and exits ADM menu.

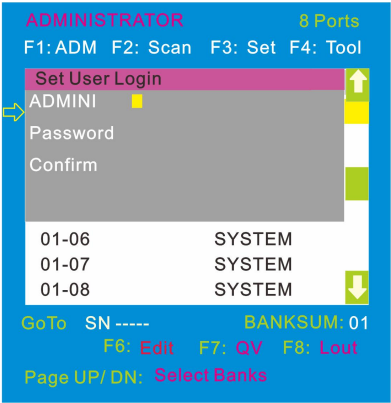

● Menu explanation

1. Set User Login—Press **【Enter】** and select Set User Login,a screen as below diagram4-1.1 appears:

One administrator and four users account can be set (the account and the password are no more than 16 characters)

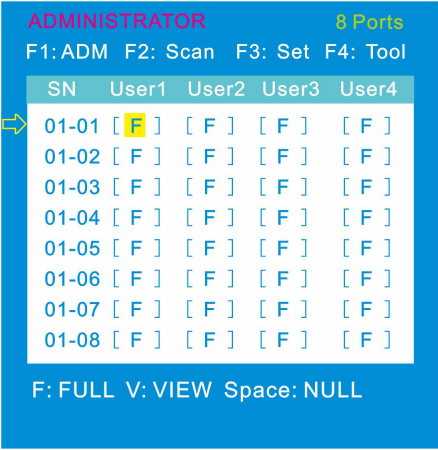

4-1.1

4-1.2

Note: You can set up an account and password according to diagram 4-1.2, then a “ User setup ok” pops up showing you have done your set, and “Password Not Match” pops up,you need to type in your password again as you did in your first type.

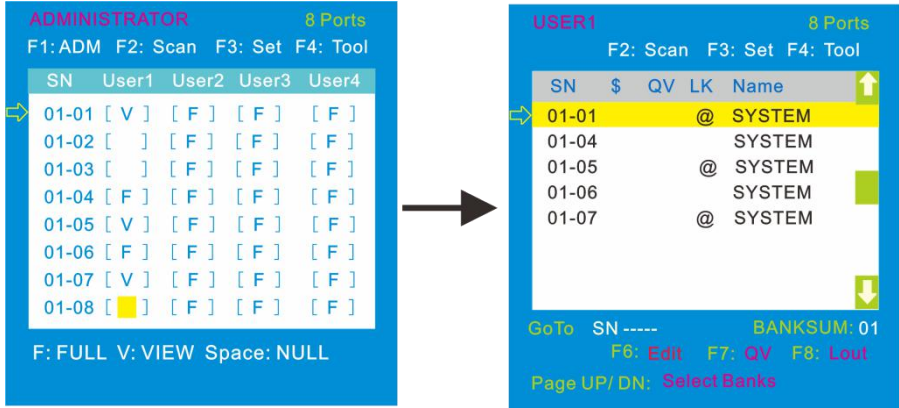

2. Set accessible—press **【Enter】** and select Set Access Permission, then below menu appears: (diagram 4-1.3):

4-1.3

| Menu | Explanation |
|------|---|
| FULL | Full access function to the station and can do any operation to the ports |
| VIEW | View only function, you can only view the port but you can't operate it if set this function. |
| NULL | If you set this function, the port will be not displayed on the user's OSD menu |

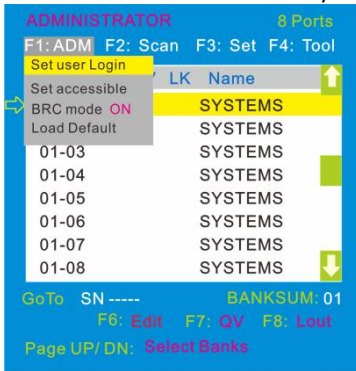

Note: The administrator always has full access to all the ports.

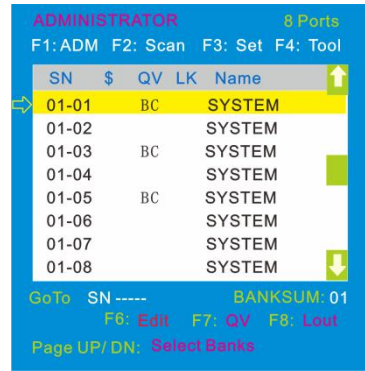

- Eg.:1). If you want to set access permission of [User1], press **【Space】** to choose the permission options you need to set.
- 2). [User1] log in OSD menu, as shown in diagram 4-1.5.

3.BRC Mode - Press **【Enter】** to enter the BRC mode. Enter the main menu,press **【F7】** to add or remove a port that need broadcast function. When BRC mode is effect, a speaker symbol appears in QV column. (see below diagrams).

While BRC mode is in effect, we can operate multiple computer ports simultaneously, but the mouse is not function normally.

4-1.6

4-1.7

1) Open BRC mode

【F1】 ->BRC Mode OFF->press **【Enter】** -> BRC Mode ON (see diagram 4-1.6)

2) Open the port that need broadcast function

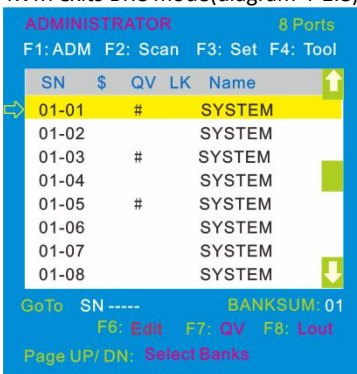

Press **【↑】** **【↓】** key—>select the port that need broadcast function →press **【F7】** → a “BC” symbol appears in the QV column which shows the port has entered broadcast mode.

3) Close the broadcasting port

Press **【↑】** **【↓】** key—>select the port→press **【F7】** →exit BRC mode and the “BC” symbol disappears

4) Exit BRC mode

Invoke OSD main menu → **【F1】** ->BRC Mode ON ->press **【Enter】** --> BRC Mode OFF, the KVM exits BRC mode(diagram 4-1.8)

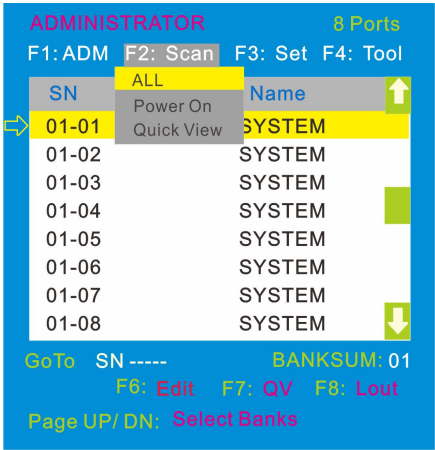

4-1.8

Press **【F1】** ->BRC Mode OFF
->press **【Enter】** ,enter the main menu, all “#” symbols turn into “BC” symbol(diagram 4-1.7)

4. Load Default--- press **【Enter】** and select Load Default, all the set values are restore to original factory default settings.

F2-Scan

● Menu overview

Operating instructions

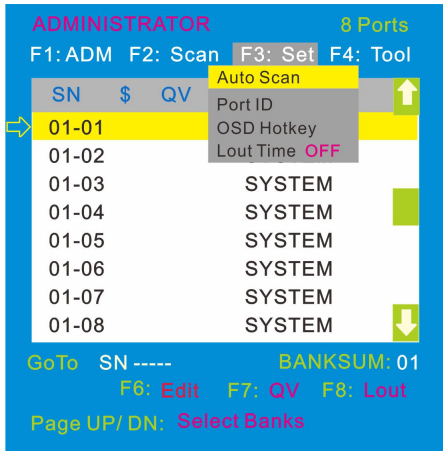

- 1) Press **【F2】** or **【←】 【→】** enters the F2 submenus.
- 2) Press **【↑】 【↓】** moves the highlight bar to select the submenu.
- 3) Press **【Enter】** selects and exits Scan menu.
- 4) Press **【Esc】** cancels the operation and exits SCAN menu.

● Menu explanation

| Submenu | Explanation |
|------------|---|
| All | Use this function to scan all ports according to the set scanning interval. |
| Power On | Use this function to scan all ports with “\$” according to the set scanning interval. |
| Quick View | Use this function to scan all ports with “#” quick view symbols according to the set scanning interval. |

F3-Set

● Menu overview

Operating instructions

- 1) Press **[F3]** or **[←]** **[→]** enters the F3 submenus.
- 2) Press **[↑]** **[↓]** moves the highlight bar to select the submenu.
- 3) Press **[Enter]** selects and exits Set menu.
- 4) Press **[Esc]** cancels the operation and exits Set menu.

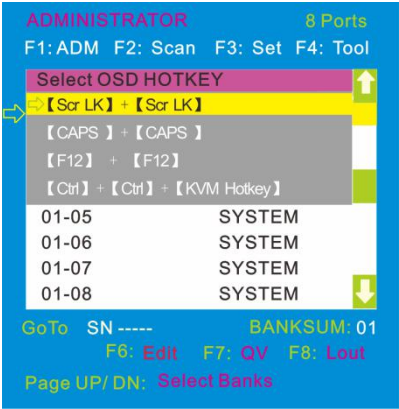

● Menu explanation

| Submenu | Default value |
|---------------|---|
| Auto Scan | 5S（effective range 5-99） |
| Port ID | 0S: not display the port ID 1-98S: display the seconds, maximum 98s 99S: permanent display |
| OSD Hotkey | [Scroll Lock] + [Scroll Lock] [Caps Lock] + [Caps Lock] [F12] + [F12] [Ctrl] + [Ctrl] + [KVM Hotkey] |
| Lout Time off | 0: close the screen saver setting 01-99M: set the screen saver timeout Note:It is automatically log out if the current operator is no longer operate for a while, then the KVM will be locked and you need to enter user name and password to operate again:  |

OSD Hotkey Operation

Operating instruction

- 1. Press **【F3】** and move the highlight bar with **【↓】** to select “OSDHotkey”submenu . Press **【Enter】** and below screen appears:
- 2. KVM default hotkey: **【Scroll Lock】**

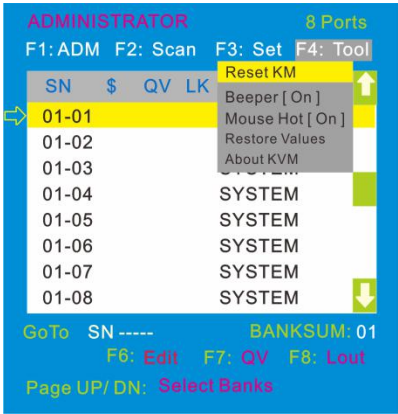

- 3. Select the“**【Ctrl】【Ctrl】 + 【KVM Hotkey】**” and press **【Enter】**, and then the **【Ctrl】** hotkey is availablein this hotkey mode, themouse hotkey can't enter the OSD menu

Invoke hotkey: double click **【L_Ctrl】** + the corresponding function key

| Function | Operating | Function description |
|----------------------|---------------|--|
| Switching port | + 1~8 | Skip ports from 1~8, Eg.: Double click 【L_Ctrl】 plus 2 to skip to the second port of the current station. |

FAQ

1. The KVM console do not work when I connect and use the console for the first time.

Solutions:

Please re-connect the KVM console according to below steps:

- 1) Disconnect all the signal and power cables connected to KVM.
- 2) Then power on KVM and you hear the boot indicating sound from the beeper, a screen automatically pops up for you to enter the user name and password.
- 3) Type in the correct user name and password, the original password is clicking Enter twice, then the OSD main menu pop up on the screen.
- 4) Check the KVM console and make sure it can normally switch ports.
- 5) Connect one server (PC) to one of the KVM ports with signal cable and check port switching function, check the keyboard and mouse, if they are not working, try to re-start the server (PC).
- 6) After successfully finishing all above steps, gradually add server (PC) to this console until meet your need.

2. I can't log in the KVM system after starting computer.

Solutions:

- 1) Make sure the KVM keyboard is working, the user name and password is correct. The default value is blank, you can log in after press Enter.
- 2) If you still can't log in the system, try to connect an external USB keyboard. (The original default value is blank; you can log in after double clicking Enter)

3. I can't switch from one port to another after logging in the KVM system.

Solutions:

- 1) Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.
- 2) Please contact the distributor or the KVM manufacturer.

4. Bad display quality of PC screen.

Solutions:

- 1) Check the signal cables, make sure they are connected.
- 2) Reset the monitor's display settings.

5. When I switch to one port, the keyboard and mouse do not work.

Solutions:

- 1) Make sure you have exited the OSD menu.
- 2) Invoke the OSD main menu and check the user name on the top left, make sure the user has got the access permission from the administrator.
- 3) Pull out the USB port of the server (PC) then plug in.

6. I can't invoke the OSD main menu.

Solutions:

- 1) Check the keyboard to make sure it is working.
- 2) Double click **【Scroll_Lock】** .
- 3) Double click **【F12】**
- 4) Double click **【Caps Lock】**
- 5) Double click **【Ctrl】 + 【Space】**
